

Troy, Michigan, April 18, 2007: Systems Technology Group, Inc. (STG) CEO Anup Popat will speak at the 2007 Global Automotive Conference in Louisville, KY on April 23, 2007.

The 8th Annual Global Automotive Conference is hosted by the Center for Advanced Leadership. The Global Automotive Conference (GAC) was created in 2000 to analyze and benchmark new ideas that will affect the automotive industry. Now in its eighth year, GAC brings together executives, senior and middle management of automotive assemblers, suppliers, and service providers to discuss issues and action plans with government participants and educators from advanced learning institutions.

The topic of discussion that Anup Popat will speak about is "**Global Information Technology Sourcing**". Automotive OEMs and suppliers are leveraging information technology considerably to increase their efficiency, productivity, and profitability. Leveraging and sourcing technologies in various parts of the world has been widely adopted by both OEMs and their supplier. This session will focus on both challenges and opportunities in leveraging information technology globally.
