

Troy, Michigan, October 9, 2006: Systems Technology Group, Inc. (STG) announced that the Michigan Department of Transportation has awarded STG the MDOT Adopt-A-Highway system. STG cited its deep expertise in implementing solutions leveraging Microsoft's .NET technology framework as a key factor for winning this software integration project.

The Michigan Department of Transportation (MDOT) is responsible for planning, designing, and operating streets, highways, bridges, transit systems, airports, railroads and ports for the State of Michigan.

The State of Michigan's Adopt-A-Highway Program was established in 1990 to improve the beauty of Michigan highway roadsides with community help. Sponsoring groups participate in litter pickups along their "adopted" stretch of roadway three times per year. MDOT provides the groups with trash bags, orange safety vests, and MDOT arranges for pick up of the filled bags. Since 1990, Adopt-A-Highway local groups have collected over a million bags of trash. Currently 3,000 groups are participating in the program and have adopted over 6,900 miles of Michigan highways.

STG was awarded a fixed price outsourcing contract for providing end-to-end solution for this project. STG is responsible for all application development life cycle activities including analysis, technical design, construction, testing and deployment.

About Systems Technology Group, Inc. (STG)

Headquartered in Troy, Michigan, USA, STG is a global information technology services company specializing in providing the Fortune 500 companies with software and systems integration services. Specifically, STG specializes in Software Application Development, Data warehouse, Business Intelligence/Analytics, Service Oriented Architecture, Legacy Migration, and Software Integration services.
