

**Troy, Michigan, August 2, 2007:** Systems Technology Group, Inc. (STG) is pleased to announce that the State of Michigan, Office of Retirement Services has awarded STG a contract to develop an online service oriented architecture application to provide online self services to the State of Michigan retirees.

This system will help improve the customer service to the largest retirement group in the State of Michigan. The following government employee systems will be integrated into this new online web self service application:

- Michigan Public School Employees
- Michigan State Employees
- Michigan State Police Employees
- Michigan Judges

The State of Michigan decided to build this web self service application because the State expects a substantial annual increase in the number of individuals retiring and a consistent annual increase in the number of Michigan employees becoming inactive.

This new system is expected to provide fast, easy access to complete and accurate information and exceptional service.

STG was chosen for this project because of STG's expertise in building and deploying Service Oriented Architecture (SOA) large scale applications. STG is responsible for providing end-to-end solution for this project.

### **About Systems Technology Group, Inc. (STG)**

Headquartered in Troy, Michigan, USA, STG is a global information technology services company specializing in providing the Fortune 500 companies with software and systems integration services.
