

**Troy, Michigan, April 12, 2004** - Systems Technology Group, Inc. (STG) announced that DaimlerChrysler Corporation awarded STG Phase I of the Chrysler Group North America Service Contracts Extended Warranty system replacement initiative.

Under this phase, STG will be responsible for defining business requirements, technical architecture definition, technical design, software development, and implementation of the service contracts product definition sub-system.

Under this fixed price outsourcing agreement, STG will develop Internet systems that will support Chrysler Group North America Service Contracts Extended Warranty business. STG will develop these systems using STG's proprietary PRIDE® J2EE/XML framework.

This sub-system is the first of many that will essentially replace all legacy systems supporting Chrysler Group North American Service Contracts business.

STG was awarded this contract because of STG's successful track record in delivering on time and within budget solutions to several other business groups within DaimlerChrysler Corporation.

**About Systems Technology Group, Inc. (STG)**
