

**Troy, Michigan, September 6, 2005** - Systems Technology Group, Inc. (STG) announced that the State of Maine awarded STG the Integrated Public Health Information System (IPHIS) project.

The primary objective of the IPHIS project is to improve the flow of information between the Maine Bureau of Health and external entities, such as health care providers and public health agencies. The Integrated Public Health Information (IPHIS) vision is to have a scalable Public Health Information System that can integrate multiple information subsystems.

STG will provide application design, development and data conversion services.

**About Systems Technology Group, Inc. (STG)**

Headquartered in Michigan, STG is an information technology services company specializing in application software development, strategic outsourcing, and software integration services. STG's clients gain a competitive advantage by leveraging STG's unique onsite, offsite and offshore delivery capabilities and SEI CMMi Level 3 processes. STG's successful on-time and within budget track record has helped STG achieve a 90% repeat business referral rate from customers.
