

**Troy, Michigan, October 12, 2005** - Systems Technology Group, Inc. (STG) announced that DaimlerChrysler Corporation awarded STG a large offshore application-outsourcing contract to execute the migration of DaimlerChrysler's extended warranty portfolio systems from IBM legacy to a more robust Internet platform using J2EE and IBM WebSphere technologies.

Under this fixed price outsourcing agreement, STG will leverage STG's unique PRIDE® Offshore Delivery methodology.

STG offers a unique on-site:offshore delivery model to help our clients reduce application development and applications management costs. Not only does outsourcing help DaimlerChrysler reduce costs, but also enables them to better utilize their employees and focus more on strategic business objectives.

**About Systems Technology Group, Inc. (STG)**

Headquartered in Michigan, STG is an information technology services company specializing in application software development, strategic outsourcing, and software integration services. STG's clients gain a competitive advantage by leveraging STG's unique onsite, offsite and offshore delivery capabilities and SEI CMMi Level 3 processes. STG's successful on-time and within budget track record has helped STG achieve a 90% repeat business referral rate from customers.
