

Troy, Michigan, January 18, 2005 - Systems Technology Group, Inc. (STG) announced the State of Washington has awarded STG a data-warehouse outsourcing project to help the State identify Washington companies that should be researched for tax compliance.

The State of Washington Department of Revenue collects more than 94% of state taxes and a significant share of local taxes. Approximately 97% of the collected revenue is reported voluntarily, while the rest is collected through a variety of enforcement efforts by the operating divisions.

To better identify candidate companies that should be researched for tax compliance, the State of WA wanted to create a data warehouse information that will serve as a sophisticated assessment tracking and analytics system.

STG was awarded this fixed price outsourcing contract under a competitive bid solicitation issued by the State of Washington. STG will be developing this datawarehouse information system using Business Objects and Microsoft SQL Server technologies.

About Systems Technology Group, Inc. (STG)
